Profile

As a candidate of employment my goal is to utilize my creative and technical skillsets coupled with my hardworking personality to provide value to the company. I am fully aware of the talents of other candidates in my position. While I do have my own set of talents and applicable strengths, what sets me apart from them is the work ethic I've forged from the fires of multiple kitchens and quenched in the dirt of many other blue-collar jobs.

Education

Kennesaw State University

B.S. | Computer Science
